

RGA2

FALL ARREST BLOCK - 10M RGA2/EDGE

The RGA2/EDGE is a multi purpose fall arrest block, which allows uninhibited movement during normal working activity.

The addition of a shock pack means this block can be used whilst working over the edge. However horizontal use or foot level attachment should still be discouraged as there is a risk of serious injury from striking objects. The carrying handle is part of the cast alloy housing and can be connected to the anchorage point using soft slings or a connector.

For self-connecting to the block, it is recommended that the operative uses an extension strop (RGL4) in order to ease the task. The RGA2/EDGE is supplied with galvanised wire cable.

EN 360:2002

VG11.060

Line material:	5mm galvanised wire
Case material:	Alloy
Shock pack material:	Polyester
Connector(s):	Double action high tensile steel swivel karabiner
Weight:	7.1kg
Max user weight:	140kg
Max force:	<6kN

FEATURES

Built-in fall indicator

Shock absorber

DIMENSIONS (APPROXIMATE)

RGA2 EDGE
