

Hack8 Connector

Hack8 Connector

The Hack8 connector is a core component within any Hackett grade 8 chain sling assembly. As its name suggests, it connects lengths of chain to both master links and sub assemblies, as well as varous end fittings such as shackles and eye hooks. Manufactured from alloy steel, the Hack8 connector delivers an excellent balance between toughness and ductility. The Hack8 connector has been independently verified and awarded the DGUV Test H-Mark for lifting components, issued under number H83.

Standards designed and manufactured in accordance with EN1677-1

and suitable for use in chain slings certified to EN818-4.

DGUV Test H-Mark certified under number H83. **Third-party**

accreditation:

Product sizes: available for chain sizes from 7/8mm to 32mm and with

working load limits from 2.0 tonnes to 31.5 tonnes.

Temperature: operational temperature range of - 40°C to + 200°C

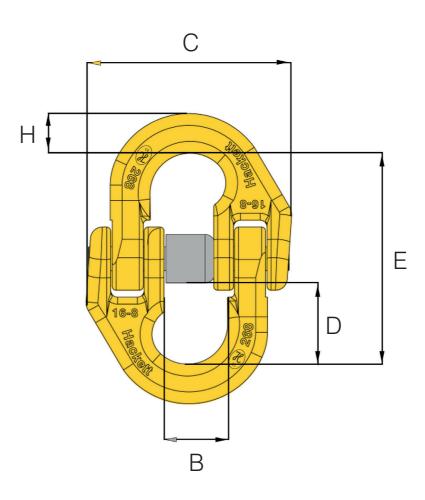

without reduction in working load limit.

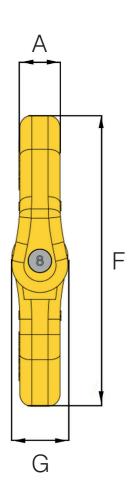

Material: alloy steel.

Testing: crack detection following heat treatment, and proof load

tested to 2.5 times working load limit.

Safety factor: 4 : 1.
